How to Make AI Videos with Nano Banana & Google Veo Flow

If you've ever wanted to create studio-quality videos without picking up a camera, this guide is for you. Let's break it down in a simple, practical way — the Abhi Club way.

1 Understand the Tools

Nano Banana

A lightweight AI tool for fast video generation, great for creators who want quick outputs. Think of it like a sketchpad for video ideas.

Google Veo Flow

Google's advanced video model for high-fidelity video. This is where you turn your rough sketch into a cinematic cut.

 Pro Tip from Abhi:

Nano Banana helps you move fast. Veo Flow helps you polish. Speed meets quality.

2

Write a Prompt that Works

Instead of overloading your prompt with technical details, focus on **storytelling**. Keep it natural, visual, and time-bound.

```
"A sleek black car racing down Miami streets at night, neon reflections glowing, cinematic lighting, 4 seconds."
```

3

The Abhi Club Workflow

First, run your creative draft in **Nano Banana**. You'll get a quick preview, usually lower resolution but fast.

Then, take that same idea and push it into **Google Veo Flow** for a refined, high-quality render.

Adjust with iterative prompts — shorter is better.

4

JSON Prompt Reference

Here's a production-ready JSON structure that you can adapt for both tools. This is what **Abhi Club** uses for professional video campaigns:

```
{
  "project": {
    "title": "Abhi Club AI Video Demo",
    "creator": "Abhi Club",
    "description": "Welcome to Abhi Club — 10 years of marketing experience with AI."
  },
  "video": {
    "prompt": "A futuristic black cybertruck transforms from a SpaceX rocket at full blazing speed, surrounded by smoke and neon city lights, dark cinematic theme, 4 seconds long.",
    "duration_seconds": 4,
    "resolution": {
      "width": 1920,
      "height": 1080
    },
    "style": {
```

```

    "tone": "cinematic",
    "color_palette": "dark neon",
    "camera_movement": "dynamic tracking shot",
    "frame_rate": 30
  },
  "audio": {
    "background_music": "dark electronic with heavy bass",
    "sound_effects": ["engine rev", "metal transform impact", "smoke
release"],
    "voiceover": {
      "text": "Welcome to Abhi Club. I share 10 years of marketing experience
with AI.",
      "style": "confident",
      "language": "en-US"
    }
  },
  "workflow": {
    "step_1": "Generate draft video using Nano Banana with fast output
setting",
    "step_2": "Refine and upscale the draft using Google Veo Flow for cinematic
quality",
    "step_3": "Export final video in MP4 and WebM for social sharing",
    "step_4": "Add captions and branding overlay for marketing distribution"
  },
  "distribution": {
    "platforms": [
      {"name": "TikTok", "format": "vertical", "length_limit": 15},
      {"name": "Instagram Reels", "format": "vertical", "length_limit": 30},
      {"name": "YouTube Shorts", "format": "vertical", "length_limit": 60}
    ],
    "cta": "Follow Abhi Club for more AI-powered marketing strategies."
  }
}

```

What Makes This Production-Ready:

Includes project metadata (title, creator, description) • Video block handles prompt, style, duration, resolution, audio, and voiceover • Workflow block reminds your process: Nano Banana → Veo Flow → export • Distribution block is marketing-focused (TikTok, Insta Reels, Shorts) with CTA
